

Neighborhood Analysis

1. Introduction/Business Problem

If someone is looking to open a restaurant, where would you recommend that they open it? Similarly, if a contractor is trying to start their own business, where would you recommend that they setup their office?

In this project we will group neighbourhoods based on the most common venues in the area and recommend locations to open a new café based on the findings.

2. Data Acquisition and Cleaning

Data comes from exploring venues in Toronto's neighborhood in Foursquare.
